

Safety Quik®

A blue Safety Quik gas connector assembly is shown against a blue background. The assembly consists of a blue plastic body with a brass valve handle, a brass fitting, and a blue hose. A brass cap is shown detached from the top of the blue body. The blue body has text that reads "INDOOR USE ONLY" and "1/2\"/>

Safety Valve

This innovative safety device acts as a shut-off valve and quick-disconnect. The gas connector cannot be disconnected until the gas flow is shut off. Likewise, the valve cannot be opened until the gas connector is re-attached.

Safety Thermal Shut-off

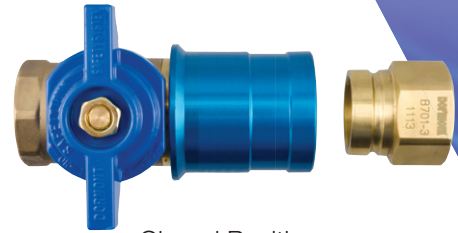

The shut-off stops the flow of gas when the internal temperature reaches between 250-300°F.

One-handed Quick Disconnect

The simple one-handed operation of the Safety Quik makes connecting and disconnecting the equipment from the gas supply easier for servicing and cleaning.

Safety Quik®

Closed Position

Product Specifications

- Material: Brass body construction, aluminum safety-sleeve
- Quick-Disconnect: Flat-face, push-to-connect design
- Thermal Shut-off: Shuts off gas at temperatures between 250 - 300°F
- Valve: Full port brass ball valve, CSA design certified
- Safety Sleeve: Built-in safety-sleeve prevents incorrect use of gas connector and uncontrolled gas flow
- Safety Quik is always installed at the gas supply end of the connector

NOTE: Safety Quik is not for use in temperatures less than 32°F

Gas Connector Kits with Safety Quik and Double Swivel Max

Part #	Inside Dia	24"	36"	48"	60"	72"
